

## **bioRxiv preprints can now be submitted directly to the Bulletin of Mathematical Biology**

The Society for Mathematical Biology is happy to announce that authors of manuscripts posted on the preprint server bioRxiv (<https://www.biorxiv.org/>) can now submit their papers directly to the Bulletin of Mathematical Biology (BMB).

The BMB has always welcomed manuscripts posted on bioRxiv, and we are now delighted to offer submission of bioRxiv preprints to the BMB. bioRxiv can save authors time in submitting papers to the BMB by transmitting their manuscript files and metadata directly from bioRxiv.

The Society for Mathematical Biology partnership with bioRxiv/Cold Spring Harbor Laboratory emphasizes our commitment to rapid open dissemination of scientific research.
